'30,000 feet view': The big picture of Dalal Street

Good Morning & Welcome to Monday's trading action at Dalal Street, dated 5th of November 2018.

The big question of the day: Will the mood at Dalal Street be cheerful ahead of Diwali?

Well, this Monday morning, SGX Nifty is indicating a muted open, and most importantly may erase some of last week's gains that saw the benchmark Nifty surging above the psychological 10,500 mark.

Now, before we get into detail, let's see what caught our eye in last 36 hours:

1. Friday's stronger-than expected U.S jobs report reaffirms the consensus that the Federal Reserve will again raise interest rates soon.
2. All eyes will be on the interest rate decision by the Federal Open Markets Committee (9th November 2018).
3. Confusion crops up again over prospects for a near-term resolution to the prolonged U.S.-China trade spat.
4. US mid-term elections (6th November 2018).
5. Trend in Oil prices on backdrop of US sanctions on Iran which came into effect from Sunday, November 4. Crude prices are seen trading sluggish, but Iran sanctions still a big worry.
6. Today, all eyes will be on SBI's Q2
7. On Friday, the Indian Rupee clocked its biggest single-day gain in over five years, surging by 100 paise.
8. The upcoming assembly elections in five states- Madhya Pradesh, Rajasthan, Chhattisgarh, Mizoram and Telangana.

Our **call of the day** suggests investors would be wise to get defensive for the day amidst blurry outlook. We suspect, markets across globe will remain volatile until concrete progress is made in U.S.-China trade relations.

Nifty faces major hurdles at its 200-DMA at 10,707 zone.

Outlook for Monday: Consolidation day likely.

After a muted open, we suspect stock specific action likely to command investors' attention. Trading is likely to be light as trading at stock exchanges will not take place on November 7-8 on account of Diwali, other than the brief traditional Muhurat Trading on Diwali day.

Technically, Bank Nifty is attempting a major rebound on daily charts from an lower consolidation zone.

The Index is in consolidation mode and the momentum oscillators will shift on buy mode on any move above 25901 and such up move needs to be backed by increases in volumes.

Key support to watch in near term is at 25295 zone. Medium term supports seen at 24550 zone.

Buy between 25300-25401 zone, targeting 25901 zone and then aggressive targets at 26101-26251 zone with stop at 24911.

What Technical Tells Us on Nifty:

The benchmark Nifty settled with modest gains in Friday's session primarily on backdrop of weakness in crude-oil prices and strength in Indian Rupee. The market breadth, indicating the overall health of the market, was positive. The BSE Mid-Cap index rose 0.78%. The BSE Small-Cap index rose 0.76%.

Sensex ended a tad above the psychological 35,000 mark and Nifty ended way above the psychological 10,500 mark.

Technically speaking, key support for Nifty in near term is at 9,951 mark. The technical landscape will worsen further if Nifty closes below the 9,951 mark as that would open the door to massive technical selling, possibly quickly towards the 9750-9801 zone.

Intraday supports on Nifty are placed at 10447. The intraday bias is positive and buying on any excessive weakness should be the preferred strategy.

The make or break hurdles are at 10707-10,775 zone. Intraday hurdles at 10,611 mark.

The price action for Nifty is suggesting that we are likely to see an 10251 -10,711 range in near term with neutral bias.

Bulls Vs. Bears: Time to Pick a Side!!

Volatility likely to be the hallmark of today's trade.
