'30,000 feet view': The big picture of Dalal Street

Good Morning & Welcome to Tuesday's trading action at Dalal Street, dated 6th of November 2018.

This Tuesday morning, the excitement for Diwali festivity is seen warming up Dalal Street. As we head towards an electrifying and sparkling trading session, we take this opportunity to wish all our valued readers, 'a very pleasant and safe Deepavali and Prosperous Samvat 2075'.

Meanwhile, we have come up with our 'Diwali Picks 2018'. The five preferred stocks mentioned in 'Diwali Picks 2018' have balanced investment approach with familiar names and with newly fabulous flight potential. We believe, these stocks will bring prosperity to your portfolio. All of them have a chance to be the best growth stocks in 2019. We recommend these value picks for investment on 'Accumulate' basis, which we feel have lots of value in terms of growing business, improving margins, better balance sheet /cash flows, etc.

For details on the list of stocks, please refer to our 'Diwali Picks 2018'.

Outlook for Tuesday: Electrifying session likely.

This Tuesday morning, SGX Nifty is indicating a positive start for our stock markets. After a spectacular higher start, we suspect stock specific action likely to command investors' attention. Trading is likely to be light as trading at stock exchanges will not take place on November 7-8 on account of Diwali, other than the brief traditional Muhurat Trading on Diwali day.

Now, before we get into detail, let's see what caught our eye in last 24 hours:

1. US mid-term elections (6th November 2018).
2. Trend in Oil prices on backdrop of US sanctions on Iran which came into effect from Sunday, November 4. Crude prices are seen trading sluggish, but Iran sanctions still a big worry.
3. All eyes will be on the interest rate decision by the Federal Open Markets Committee (9th November 2018). Federal Reserve policy makers are expected to leave the main interest rate unchanged at their penultimate gathering of 2018
4. Confusion crops up again over prospects for a near-term resolution to the prolonged U.S.-China trade spat.
5. In Monday's trade, the Indian Rupee plunged by 67 Paise to Slip Below 73 Mark against Dollar.
6. The upcoming assembly elections in five states- Madhya Pradesh, Rajasthan, Chhattisgarh, Mizoram and Telangana.

Our **call of the day** suggests investors would be wise to get defensive on any excessive strength amidst blurry outlook and ahead of holidays. We suspect, markets across globe will remain volatile until concrete progress is made in U.S.-China trade relations. Nifty faces major hurdles at its 200-DMA at 10,707 zone.

STOCKS TO WATCH:

- Our **chart of the day** suggests Reliance Industries, Page Industries and Britannia appear attractive on any early morning declines with 2-3 days perspective.

- **Bearish stocks:** BHARTI AIRTEL, DR REDDYS LAB, TATA GLOBAL, JET AIRWAYS, BAJAJ AUTO, RCOM, BHEL.

Technical Strategy

BRITANNIA	5714
Action	Buy
Target	6050
Support	5441/5251
Resistance	5901/6275
Holding Period	3 Days.

In yesterday's trade, Britannia enjoyed a strong session, up 2.03%.

Technically, Britannia is attempting a major rebound on daily charts from an lower consolidation zone.

The stock is in consolidation mode and the momentum oscillators will shift on buy mode on any move above 5901 and such up move needs to be backed by increases in volumes.

Key support to watch in near term is at 5441 zone. Medium term supports seen at 6275 zone.

Buy at CMP, targeting 5901 zone and then aggressive targets at 6101-6251 zone with stop at 5411.

- Friday's stronger-than expected U.S jobs report reaffirms the consensus that the Federal Reserve will again raise interest rates soon. The U.S economy added 2,50,000 new jobs in October. The unemployment rate remained flat at 3.7%, while the report showed year-over-year wage gains rising to 3.1%, slightly above the consensus estimate of 3%.
- The U.S trade deficit rose 1.3% in September to a seven-month high as imports hit a record.
- The United States has granted exemptions to eight countries allowing them to temporarily continue buying Iranian oil, Secretary of State Mike Pompeo said on Monday, as Washington reimposed sanctions on Iran's banking, energy and shipping industries.
- Some of the eight countries - China, India, Greece, Italy, Taiwan, Japan, Turkey and South Korea - include OPEC (Organization of the Petroleum Exporting Countries) member Iran's top customers.
- The upcoming assembly elections in five states: Madhya Pradesh, Rajasthan, Chhattisgarh, Mizoram and Telangana. While Chhattisgarh will go to the polls in two phases on November 12 and 20, the Madhya Pradesh and Mizoram Assembly elections will be held on November 28. Polling in Rajasthan and Telangana will be held on December 7. Counting of votes will be held across all the five states on December 11.

CURRENCIES & BONDS:

- In Monday's trade, the Indian Rupee plunged by 67 Paise to Slip Below 73 Mark against Dollar. At the current level, the rupee is down 14.5 per cent against the dollar so far this year.. Supports for USD/INR seen at 71.75. Intermonth strategy: Buy between 71.75-72 zone, targeting 75 and then aggressive targets at 77 with strict stop below 71.45.

What Technical Tells Us on Nifty:

The benchmark Nifty settled with modest losses in Monday's session primarily on backdrop of profit booking. The market breadth, indicating the overall health of the market, was negative. The S&P BSE Mid-Cap index fell 0.47%. The S&P BSE Small-Cap index fell 0.28%.

But the positive takeaway was that Nifty managed to close above the psychological 10,500 mark amidst recovery in PSU Banks after State Bank of India gained 3.36% post its Q2. SBI posted Q2 net profit at Rs 944.9 crore, NII at Rs 20,905.7 crore. Net NPA was down at 4.84%, while Gross NPA was down 9.95%.

Technically speaking, key support for Nifty in near term is at 9,951 mark. The technical landscape will worsen further if Nifty closes below the 9,951 mark as that would open the door to massive technical selling, possibly quickly towards the 9750-9801 zone.

Intraday supports on Nifty are placed at 10447. The intraday bias is positive and buying on any excessive weakness should be the preferred strategy.

The make or break hurdles are at 10707-10,775 zone. Intraday hurdles at 10,611 mark.

The price action for Nifty is suggesting that we are likely to see an 10251 -10,711 range in near term with neutral bias.

Bulls Vs. Bears: Time to Pick a Side!!

Volatility likely to be the hallmark of today's trade.

Preferred trade on Nifty: Nifty (10524): Buy between 10461-10475 zone targeting 10611 zone and then aggressive targets at 10651-10751 zone with stop at 10367.

Preferred trade on Bank Nifty (25732): Buy between 25300-25401 zone, targeting 25901 zone and then aggressive targets at 26101-26251 zone with stop at 24911.
